ABOUT ME

I am a software developer. My expertise is in web application and mobile application development. But I don't limit myself to it.

I study and research more to stay up to date on the latest technologies.

KEY QUALIFICATIONS AND EXPERIENCE

I have more than 5+ years of experience in web and React Native mobile application development, planning and developing end-to-end experiences in different domains ranging from consumer-focused real estate and social media applications to enterprise-focused financial reconciliation and business management solutions.

ACHIEVEMENTS

Nepal's first platinum level and platinum moderator

Sololearn 2019

EDUCATION

Bachelor's Software Engineering

Nami Institute

2016-2018 (Not Completed)

Swasthani Academy

Computer Science

2012-2014

Sudarshan Rai

RARA Digital Lab Pvt Ltd

React/React Native Developer
Feb 2021 - Present

Raralabs was established with an objective to serve global customers by developing deep technology software products with specialization on Automation, Digitalization, Distribution and Data Governance. The products developed range from Fintech, ERP, Data Processing Pipelines, Social Network, HealthTech, Search Engine and are being used in Banking, Insurance, Healthcare, Corporate and Consumer sectors.

After joining Rara Labs, I basically worked on an open-source frontend library named web-feedback, made using vanillaJS to give support for all web frameworks. Then I worked on the admin portal for web feedback using RemixJS. We also worked on other projects with awesome technologies like monorepos.

Podamibe Nepal

Software Developer
2019 - 2021

Podamibe Nepal is to provide multi-skilled software services with value based solutions as well as professional services to our customers. We are delivering innovative and competent web-based software solutions through our conceptual planning, resourceful development, and efficient maintenance and support.

After joining the company, I worked on a portfolio management system in ReactJs and continued working on a social media web application in VueJs. I later worked on an interesting project like customer care, where I had to use WEB-RTC and other technologies. It was awesome.

View9

React/React Native Developer
2017-2019

View9 is a professional organization of innovative minds combined with years of experience in business marketing and management, united to provide high quality and trustworthy services in the areas of mobile apps and bespoke software development to meet the custom requirements of clients around the globe.

I have worked on a cross-platform dictionary app, which was used to translate traditional Limbu words into Nepali in React Native. Then I worked on an online money transaction and a flight booking and tracking web application. Since then, I have worked on other different projects on both mobile and web platforms.

Sudarshan Rai
